LAGUNA LOOKOUT—A new series of interpretive sign panels have been installed to explain the ecology of the Laguna de Santa Rosa in Sebastopol's newest park. The recently developed Laguna Park, between the softball fields behind the Sebastopol Community Center, includes the four signs in a redwood panel that faces the main Laguna channel just a few dozen feet away. The signs, which discuss the Laguna's geology, vegetation, wildlife and hydrology, were prepared with the help of Friends of the Laguna.
