## Laguna in Balance holds out hope

98.25

may 6

**S**unday's "Laguna in Balance" was a hopeful event. Starting with a cleanup in the morning, hundreds of visitors and participants spent the day learning about the value of the Laguna de Santa Rosa and current efforts to restore and preserve this natural wonder.

Guests were treated to tours, presentations and political messages, all intended to raise awareness of the function and unique ecology of this waterway and wetland that provides habitat for many native flora and fauna.

We applaud and encourage the sponsors and organizers of this event and urge them to keep up their efforts to restore and defend the Laguna de Santa Rosa.
