I'm in favor of saving as much of the wild habitat as possible. Personally, I would like to see community scrutiny and input when rearranging or changing natural habitats. Another concern would be implementing docent guides.

What should happen with restoration of the Laguna de Santa Rosa

I think that more access to nature paths would be something I would like to see. I would like to see it kept nice so we can see more wildlife. I also want there to be safe access.

Julia Lyman
Sebastopol

I would like to see the consciousness of the community raised. I do want to see the Laguna preserved.

Jim Coconas
Sebastopol

I'd like to see it kept as naturally as possible without our access impacting. I would like to see information and learning opportunities.

Sophia Rose

In school I did a report on the Laguna. I would like to see more native animals returned to their habitat.
