Laguna park needs volunteers

SEBASTOPOL — The city's planning department hopes to recruit "a few good volunteers" to help maintain the new Laguna de Santa Rosa Wetlands Preserve, Sebastopol Planning Director Kenyon Webster announced this week.

Help is needed to water and weed the more than 1000 native plants installed by volunteers to help ensure that the new plants "have a

chance to get established," said Webster. The City hopes to begin the volunteer park maintenance effort sometime next month.

Individuals or groups who could volunteer as little as half a day once a month would help the cause. To sign up or for more information on how to become a "Laguna keeper" call Kenyon Webster at the City Planning Department, 823-6167.
