

ENHANCING AND CARING
FOR THE
LAGUNA DE SANTA ROSA

**ENHANCING AND CARING
FOR THE
LAGUNA DE SANTA ROSA**

VOLUME II

Resource Set

Joseph Honton & Anna Warwick Sears

with contributions by
Betty Burridge, Amber Manfree,
Philip Northen and Greg Tatarian

Santa Rosa, California
2006

The Laguna de Santa Rosa Foundation
works to preserve, enhance and restore the
Laguna de Santa Rosa, and to inspire greater
public understanding and appreciation of its
magnificent natural areas.

Appendix B: Biological diversity	407
Appendix C: Water resources	431
Appendix D: Invasive <i>Ludwigia</i> management plan	441
Appendix E: Regional geophysical data	471
Appendix F: Historical excerpts	521
Index	543

Major funding for this publication and the project that created it came from the California State Coastal Conservancy which saw the need for this plan as an important part of its larger goal for preserving, protecting and enhancing California's coast and wetland treasures.

Additional funding came from the Sonoma County Water Agency whose mission is to provide water, flood protection, and sanitation services for the county.

Additional funding came from the City of Santa Rosa's Department of Utilities whose mission is to provide safe and environmentally friendly water supply, wastewater collection, and recycled water to the community.

Additional funding came from the Community Foundation Sonoma County which matches philanthropic interests with community needs that enrich the community's quality of life.
